

Remote Data Backup

Many companies still trust the backup of their most vital resource - data - to a fragmented and often ineffective policy of distributed tape devices, manual routines, and offsite tape storage. Azul Services Remote Data Backup is a business-class online backup service which addresses the drawbacks of this fragmented approach to backup:

- ◆ Fully automated process with backups held on disk for rapid file restoration.
- ◆ Secure online transfer of fully encrypted data to an offsite data center, ensuring regular backups are stored safely and remotely.
- ◆ Sound basis for business continuity planning - whatever happens, your data is safe.
- ◆ Cost-effective solution with an all-inclusive monthly service charge.
- ◆ 24 x 7 live customer support

Technology Overview

- Agentless Client
- Compression
- Encryption
- Delta Blocking Incremental Backup
- In-file Deduplication
- Open File Backup
- Simple User Interface

Service Features

- Microsoft Exchange
- Microsoft SQL
- File Servers
